

New service: The Laptop Man can now visit YOUR business!

WHETHER you're a small or medium enterprise, The Laptop Man, located in Mackay, Sarina and the Northern Beaches can now come to you, for all your computer and IT requirements.

The Laptop Man managing director, Kevin Patroni said his newly established small to medium

business service was established for two reasons.

Firstly, to meet the growing demand for a go-to computer service in the local area, to ensure businesses experienced little interruption to their operation, when IT problems presented themselves.

Secondly, Mr Patroni said he had

employed qualified technicians to provide cutting-edge, IT solutions to maximise business efficiencies.

For instance, The Laptop Man can now visit your business, identify inefficiencies, discuss your plans for growth and provide networking and IT solutions, which are tailor-

made for your individual business requirements.

In fact, the Laptop Man can now help your business with everything from virus scans through to networking and server installations.

TESTIMONIALS: *Satisfied clients have their say...*

Samantha Roberts Snap Fitness

"When we opened Snap Fitness at Northern Beaches, we had internet and computer problems to start with. Having The Laptop Man downstairs was a blessing as they would come up at the drop of a hat and help fix the problems as they arose. Not once did they let us down. We also required a new laptop, which we purchased from them. The Laptop Man are the easiest company I have dealt with, when it comes to computers and laptops. I would highly recommend the company to anyone whom requires repairs/ help and or a new computer or laptop."

Jatz Operations Manager Grasstree Landscaping & Design Pty Ltd

Grasstree Landscaping have been utilising the services of the Laptop Man for the past 5 years.

As an ever growing company we required someone who understood the importance of providing the personal and priority service to ourselves and understand the necessity of "Down Time" for our business. The Laptop Man has always moved Heaven and Earth to rectify any issues we have had whether it be our Main Server, a single laptop, software issues etc. A large part of the service the Laptop Man has provided is "Remote problem solving". We work in alot of remote areas with our computers and laptops, alot of other computer companies don't understand how difficult it can be out in these remote areas and we often hear "Just bring it into our shop and one of our techs can have a look at it". The Laptop Man has set his services up to enable access to our computers and laptops from their main offices around Mackay, which means they have the ability to log into our computers (with our authority) no matter where we are in Australia, this allows the technicians to resolve issues from Mackay and we do not have to take the computers into town. This has proven to be priceless in the past. We would like to thank and congratulate Kevin and his crew for the services they have provided over the years and the success in his business. The growth in his business shows there are alot of satisfied customers throughout the Mackay Region who keep coming back to the Laptop man not only for products but for the excellent services provided.

Rod Worth Principal

Complete Lending & Insurance Services

"Our business has been dealing exclusively with Kevin and The Laptop Man team for 5 years now for our hardware and peripheral needs. The service and ongoing support provided is "A class" and their pricing is very competitive. As with most businesses, we are extremely reliant on having efficient computer systems and equipment and with our association with The Laptop Man this is achieved. We consider them as a valued partner in our business and would strongly encourage any business that is looking for similar qualities from a supplier to try The Laptop Man - you will not be disappointed!!!
